

THE FRAIL

ABOUT THE FRAIL:

The Frail is a unique musical project that combines electronic technology with the songwriting brilliance of Kevin Durr and the smooth falsetto of vocalist Daniel Lannon. The product is a flirtatious radio worthy electronica, with finely crafted musical core. The Frail follow a similar trajectory of current electro projects but draw on the accessible influence of multiple genres.

After numerous recording sessions at Take Root Studios, and with much help from master engineer Scott Tusa, The Frail prepare for the release of their debut EP *Count on This* out on Tricycle Records on May 25th.

"Freshly signed to Tricycle Records and currently in the studio working on their first album, the Frail has already become an addiction for me, as I keep revisiting their MySpace page to listen again and again. For fans of The Postal Service."
